Summary

Skilled **Blockchain Developer** with hands-on experience in designing, auditing, and deploying smart contracts (ERC-20, ERC-721, ERC-1155, ERC-6551) across **EVM and non-EVM platforms**. Proficient in building secure and scalable blockchain solutions using **Layer 1 protocols** (Avalanche, Cosmos), **Layer 2 architectures** (zkEVM, CDK Validium), and private blockchains using **Hyperledger Fabric**. Experienced in **cross-chain bridge development**, **testnet/mainnet integration**, and **high-value data security solutions** using Nillion.

Adept at smart contract auditing using tools like **Slither**, **Solhint**, and proficient in decentralized data systems such as **IPFS**, **OrbitDB**, and **nillionDB**. Skilled in containerized infrastructure with **Docker**, **RabbitMQ**, and **Geth**. Strong in full-stack development using **Node.js**, **HTML**, and **CSS**, with automation expertise using **Juju**, **Multipass**, and **n8n**.

I am **detail-oriented**, **proactive**, and value **collaboration**.

Technical Skills

Blockchain Development

- **Languages:** Solidity, Go, Rust, Python, JavaScript, TypeScript.
- **Smart Contracts:** ERC-20, ERC-721, ERC-1155, ERC-6551, Hardhat, Foundry, Remix IDE, Truffle, nada-dsl.
- **Auditing & Documentation:** Slither, Solhint, NatSpec, Dockgen.
- **Web3 Tools:** Ethers.js, Web3.js, MetaMask, Keplr, Geth, Core.
- **Blockchain Platforms & Frameworks:** Ethereum (Sepolia, Infura), Polygon (zkEVM, CDK Validium, Erigon), Avalanche, Cosmos SDK, Hyperledger Fabric, Nillion.
- **Decentralized Tech:** IPFS, OrbitDB, Bacalhau, IPVM, NillionDB.
- **Infrastructure & DevOps:** Docker, RabbitMQ, Juju, Multipass, n8n.

Frontend & Backend Development

- **Frontend:** HTML, CSS, Next.js, TypeScript.
- **Backend & APIs:** Node.js, FastAPI, Postman, Flask.
- **Databases:** PostgreSQL, MySQL.

Artificial Intelligence

- **AI Tools:** Python, Hugging Face (LLaMA 3.2 – 1B/11B, Whisper), Jupyter.

Education

- **Dr.D.Y.Patil Center For Management and Research, Pune.** *SPPU, Pune.* 2023 – 2025
MCA CGPA : 7.88
- **MIT ACSC, Alandi Pune.** *SPPU, Pune.* 2020 – 2023
BCS CGPA : 9.36

Experience

Rainfall.one, Junior Blockchain Developer – Pune, Maharashtra, India Feb 2025 – Present

- Contributed to blockchain across Cosmos, Avalanche, and EVM-compatible networks.
- Managing Avalanche nodes and analyzing node-level transactions.
- Working on blockchain infrastructure and dApps across testnet and mainnet environments.
- Developing and auditing smart contracts (ERC-20, ERC-721, ERC-1155).
- Performed security audits using Slither, Solhint, Solvent, documented with NatSpec and Dockgen.

- Worked with Hardhat and Foundry for contract development, auditing, testing, and deployment.
- Built decentralized storage layers using IPFS, OrbitDB, and IPFS Cluster.
- Integrated automation tools: Juju, Multipass, and n8n for infrastructure and workflow automation.
- Worked on node-level transaction generation and performance analysis.

Key Projects:

- **Avalanche:** Set up Testnet/Mainnet environments, worked on faucet repo, explored Blocksout.
- **RDP LRDP Tokens:** Developed and audited ERC-based smart contracts using Slither and Solhint.
- **NillionDB:** Implemented high-security decentralized data handling and logging.
- **Smart Contract Tooling:** Added NatSpec comments, used Dockgen for docs, Hardhat Foundry for scripting.

Pure Soft Solutions, Blockchain Developer – Pune, Maharashtra, India

Jan 2024 - Jan 2025

- Developed and deployed smart contracts (ERC-20, ERC-721).
- Designed cross-chain bridges and implemented Layer 2 solutions like zkEVM and CDK Validium.
- Optimized decentralized systems for scalability and inter-node communication.
- Work on Projects :-

1. Monsoon

- Focused on developing smart contracts using ERC-20 and ERC-721 standards.
- Worked on creating cross-chain bridges and Layer 2 solutions (zkEVM and CDK Validium).

2. Nillion

- Setup the nillion testnet (py-client, js-client).
- Worked on generating inbound and outbound logs for status tracking and error management.
- Set up RabbitMQ.

Mobiloitte, Trainee Blockchain Developer – Baner, Pune

July 2023 – Dec 2023

- Designed and implemented a Private Blockchain using Hyperledger Fabric.
- Designed and implemented a Fabric explorer.
- Run the Ethereum node using GETH.
- Design and develop solidity contracts.
